### 1 Introduction

Recently, the implication of autoimmune abnormality in genesis of some sorts of reproductive failure has been reported. Several clinical reports have suggested that antiphospholipid antibodies such as anti-cardiolipin antibody increased the risk of spontaneous abortions, and the regimen consisted of the corticosteroid hormone and low-dose aspirin was reported to be an effective therapy for such patients. In this context, we administered a Japanese modified traditional Chinese herbal medicine Sairei-To (Chan ling-Tang) to patients with recurrent abortion who were found positive for antiphospholipid antibodies, and examined both the alteration of the value of antiphospholipid antibodies in the patients and the efficacy of the drug on the outcome of subsequent pregnancies of the patients.
